What Is Full Value?

The public's conception of what constitutes full value in exchange for money expended has changed completely. Not many years ago great stress was laid on the value of the material of which an article was composed. In those days an overcoat was made to last a generation, and was passed on from father to son. Today the value of the material is less important than the suitability of the article, which means style and newness and smartness rather than sturdiness and wearing quality.

Thus, the real value of an article has shifted from the "Worth of Material" to "Worthiness of Design, Convenience or Fitness."

The consumer can no longer distinguish between luxuries and necessities, between needs and wants, and is principally occupied in satisfying desires. Automobiles have become the property of rich and poor alike. The isolation of rural life is a thing of the past. Magazines, periodicals and newspapers of all kinds, with up-to-the-minute style news, find their way into the remotest homes.

All this is rapidly leading away from mass production and mass consumption in the general sense of the word, except for certain commonplace utilitarian articles used behind the scenes. Automobiles are now as much a matter of esthetic excellence as of mechanical efficiency. The cost of needless change is being disregarded and old habits of thrift and economy now share the stage with new habits of culture and refinement. Raymond A. Kline, in Merchant's Globe.

The Careless Smoker

(With Apologies to Kipling)
A foot there was and his pipe he lit
(Even as you and I)

On a forest trail where the leaves were fit
To become ablaze from the smallest bit

Of spark—and the foot he furnished it
(Even as you and I)

The forest was burned to its very roots,
Even beneath the ground,

With the flowers, the birds and the poor dumb brutes,
Old hoary oaks, and the tender shoots

Which might have made logs but for such galehoofs

Allowed to wonder around.
The lumberjack has now passed on,

And the screech-owls haunt the camp at dawn,
Where the cook's tin pan woke the men of brawn;

But the mill is silent, the trees are gone,
The soil and forest floor.

A deadly sight are those hills of rocks
Which once were beds of green;

No hope for the human, no food for the flocks;
The floods must be held by expensive locks,

While the harbor is silted to the docks—
The ships no more are seen.

But the foot smokes on in the forest still,
Leaves campfires burning too.

While the patient public pays the bill
And the nation's wealth is destroyed for nil.

If the law doesn't get him, the Devil will—
SMOKERS, IT'S UP TO YOU!

—Forest and Outdoors

The Awakening

Motorist (waking): "Where am I, where am I?"

Nurse: "This is No. 110."

Motorist: "I mean or call?"

Lusk-Harper

A pretty summer wedding at St. Andrew's church on July 21 was that of Emma Genevieve Harper, only daughter of Mr. and Mrs. J. F. Harper, and James Henry Lusk, youngest son of Mr. and Mrs. H. Lusk of this city. Rev. J. McLaughlin officiated.

To the strains of the bridal music, played by Mr. Honeyswell, the bride entered the church with her father, who gave her in marriage, and proceeded to the flower-banked altar, where the ceremony was performed. She wore a gown of ivory satin, lace trimmed, her veil being worn in cap shape, with head-dress of orange blossoms. Her flowers were pink and white bridal roses.

The bridesmaids, Miss Elsie Scott and Miss Evelyn Johnson, wore frocks of shell pink georgette with scalloped, uneven hemline. White picture hats with pink trimming completed their costumes.

Mrs. Harper, mother of the bride, wore a grey georgette ensemble with hat to match; Mrs. Lusk, mother of the bridegroom, chose black satin trimmed with lace and sand ornament.

High Lusk, brother of the bridegroom, was best man, and Hugh Shields and Harry Honeyswell acted as ushers.

Following the ceremony the reception was held at the home of the bride's parents, the table being centered with the four-tier bride's cake, and decorated with pink and white sweet peas flanked by tall pink tapers.

The bridegroom's gift to the bride was a diamond dinner ring.

Mr. and Mrs. Lusk left on the 5 o'clock train for Banff, where they were guests at the Banff Springs hotel, later proceeding to Vancouver, Victoria and other coast cities. Mrs. Lusk wore for traveling a blue and grey georgette ensemble with grey French hat completing the costume.

The invited guests were: Mr. and Mrs. J. O. Harper, Mr. and Mrs. G. W. Harper, June Harper, Mr. and Mrs. Henry Lusk, Mr. and Mrs. J. M. Ritchie, Mr. and Mrs. G. T. Henderson, Mr. and Mrs. L. Henderson, Ruth Henderson, Mr. and Mrs. Jack Musgrove, Mrs. H. B. Musgrove.

Mr. Edna Musgrove, Mr. and Mrs. E. E. Lusk, Mrs. Lillian Cooper, Mr. and Mrs. Fraser Edmunds, Mr. and Mrs. Win. Edmunds, Mrs. K. De Wolfe, Mrs. C. E. Arthur, Mr. and Mrs. Jack Hall, Mr. and Mrs. Win. Jardine.

Miss Nora Hannah, Mr. and Mrs. Campbell, Mr. and Mrs. D. Harper, Mr. and Mrs. C. Bowser, Mrs. Phoebe Withers, Mrs. Haskell, Mr. and Mrs. Hanham, Rev. and Mrs. Westaway, Miss Elsie Scott, Miss Evelyn Johnson.

Mr. J. Rohoff, Mrs. M. Edwards, Mrs. Allen Macey, Mrs. H. E. Honeyswell, Mrs. Egert Amundson, Mrs. Hugh Shields, Mrs. F. Shields, Robert Banks, Sidney Magrath, Herman Wensick.

Robert Begrie, Aynsley Orr, Ivy Stevens, Mr. Blair and Mr. and Mrs. Holland.—Calgary Herald.

The number of automobile licenses issued in Alberta during the first five months of 1929 exceeds by over 3,000 the total number for 1928. It is announced by E. Trowbridge, deputy provincial secretary. Already this year over 90,000 cars and trucks have been registered as compared with 87,221 last year. A considerable increase in the consumption of gasoline is also indicated in Mr. Trowbridge's report which shows that the revenue from the gasoline tax for the first five months has exceeded that of the same period in 1928 by some \$170,000.

Not Sanitary

"It ain't sanitary," protested the traveler, "to have the house built over the hog pen that way."

"Well, I dunno," replied the native.

"We ain't lost a hog in fifteen years."

Two old evening gowns saved together will make an excellent pen-wiper.

THURSDAY, August 1, 1929

NOTES AND COMMENT.

A provincial election in Ontario is expected in October.

The first wheat threshed at Macleod weighed 64 lbs. to the bushel and yielded 35 bushels to the acre. This is promising.

It would be well to note and act on the warning against the danger from the exhaust from tractors and trucks in the harvest fields, published elsewhere in this issue. Remember, too, that this is one of the instances where an ounce of prevention is worth a pound of cure.

It is gratifying to find the opinion almost general that in spite of the long period of dry, hot weather, the wheat has filled beyond expectations. With a good piece the lighter crop of the present year will yield returns exceeding last year's crop in many instances, especially where there was damage from frost.

Hon. R. B. Bennett is urging Canadians to spend more money on Canadian made goods. He claims \$500,000,000 now spent abroad could be retained at home.

Fifty thousand boy scouts are gathered in England on a jamboree, which is proving a splendid success.

The Republicans in the United States senate are now moving to have shingles returned to the free list, where they were before recent legislation.

The Dutch Shell and Standard Oil companies are staging a battle for the oil business in New York and district and the New England states that is expected to result in price cutting before long.

Immigration will not be encouraged to the prairie provinces at the present time owing to the short crops. Hon. Robt. Forke, minister of Immigration, is of the opinion that it will be but a short time before activities will be resumed.

The Graf Zeppelin has made its third trip across the Atlantic and after completing its fourth Atlantic trip will attempt a trip around the world.

Saskatchewan liquor profits exceeded \$3,000,000 during the past year and the price to the consumer is to be decreased. Total sales for the year amounted to \$14,007,805.08.

Registrations at Waterton national park this year will exceed fifty thousand.

Late forecasts of the Alberta wheat crop are considerably more optimistic in spite of the prolonged dry spell.—Calgary Herald.

Revenues for the nine provinces in the Dominion totalled \$108,109,504 during the last fiscal year and the expenditures \$165,538,000. With the exception of Ontario Alberta has the largest bonded debt with a total of \$90,899,810.28.

Glory can be sagely despised by those only who have fairly won it.

Two thousand men are rushing construction work on the Hudson Bay railway, but traffic will not be commenced until October.

The two leading items in the total agricultural production of Canada in 1928 are: Field crops, \$1,009,781,000; and dairy products, \$250,000,000.

Golf is a game in which the ball gives every way and the players always.

Of the 290,445 tons of salt produced in Canada last year the Province of Ontario accounted for 279,841, or 93.5 per cent., while Nova Scotia furnished the remainder.

Hon. Mr. Bennett declares Canadians should buy \$500,000,000 less in foreign countries. He goes on the assumption, of course, that even if we bought \$500,000,000 worth less we would sell as much abroad as we do now. The likelihood is that if we bought half a billion dollars' worth less, foreign countries would balance things up and buy half a billion dollars' worth less from us. And where would we be?—Lethbridge Herald.

The Alberta Department of Agriculture will furnish farm-

Just Why Is It?

Why buy your oils from salesmen you probably never saw before in your life?

Why buy excessive quantities and tie yourselves up for more stock than you need.

They tell you that you save money. They tell you it is wholesale price. **Do you believe it?**

You get exactly what you pay for, and in some instances you get stung. When you buy **Shell Oil** from us you buy a standard and uniform product.

You buy from one of the largest producers. You buy at the regular Shell Price.

You pay no more because you buy from us.

And we carry the stock for you. We carry your account if necessary. We give you service in all lines. We adjust any troubles you have. We guarantee our goods.

The Fact is you need our stock and service. We need your business in order to serve you efficiently. Make our store your headquarters for your requirements in **Oils and Greases, Threshers Supplies, General Hardware and House Furnishings.**

Be Watchful of Fire In Stubble Fields

C. S. Noble Warns Against Danger From Trucks and Tractors in Grain Fields

(Lethbridge Herald)

Never before in the history of Southern Alberta harvesting has the fire hazard in grain fields been so serious, according to C. S. Noble, of Nobleford.

Mr. Noble made this statement to the Herald on Friday over long distance telephone after clearing up the fire in his winter wheat on the Cameron ranch. He called up especially to ask the Herald to warn farmers of the danger from the exhaust pipes of trucks and tractors used so much today in harvesting by the combine method.

It was the exhaust from a truck which caused the fire on the Cameron ranch, about 15 acres of standing wheat, burning, the remainder being stubble so that the loss was not large. "I thought at one time the whole section of wheat going to go," said Mr. Noble. He advises that the exhaust pipes of both trucks and tractors where they come in contact with the stubble, should be wrapped with asbestos and otherwise protected and that fire extinguishers barrels of water with wet sacks, and other fire-fighting paraphernalia should be carried so long as the ground and the crop is as dry as it is now. Mr. Noble said he had never seen a grain field on fire, but had heard of heavy losses from this cause in Kansas, and was quite willing to believe that widespread damage could be caused in this manner.

ment stores and chain department stores show that as yet the individual operated store which is run on efficient lines had a slight advantage over chain department stores in 1929 so far as net profits are concerned. The following table from "Operating Expenses of Department Stores and Departmentalized Specialty Stores," a publication of the Bureau of Research of Harvard University, gives a somewhat detailed comparison of the relative costs in the two lines. It is of interest to note that the net profit on turnover is less than 2% in each case. When net profit is as low as that shown in this table, only the most efficient organizations can survive.—Royal Bank Letter.

Another novel manner of smuggling liquor across the border by United States citizens has been checked. United States customs officers at the upper level bridge, Niagara Falls, have excavated a large hole in the road in which they placed a mirror so that they could see the reflection of any liquor being carried on the bottoms of motor cars. This saves the officers the trouble of diving under each car in their search for liquor.

Sixth Fortnightly Crop Report

Cutting of wheat will start early next week and will be fairly general a week later in a number of districts in the province, according to telegraphic reports received on Friday by the Department of Agriculture for the sixth crop report of the season. Winter wheat cutting is well under way in the south of the province and a very satisfactory yield is reported. A good crop of spring wheat is also ripening and will yield as high as 30 bushels per acre in some southern districts.

As the result of continued dry weather and hot winds during the

past two weeks the prospective yield, particularly throughout the central part of the province, has suffered a further reduction. The wheat crop especially has been affected and much of the grain is so short in the straw that it cannot be harvested satisfactorily by the ordinary methods. The Department of Agriculture, however, is demonstrating at a number of points in this area a binder attachment which will make it possible to save practically all of this short grain, and many farmers are adopting this system with very satisfactory results. Encouraging reports are received from the Peace River where the crops have been improved by additional rainfall. The oat crop in the north gives promise of a good yield of a quality suitable for seed.

The live stock situation has been affected in some sections of the province and cattle are being disposed of in view of the limited prospects of winter feed. In a few districts it will be necessary to make provision for additional feed to carry breeding stock and work horses over winter, but arrangements can be made to ship this in from other localities where hay and feed have been less seriously reduced.

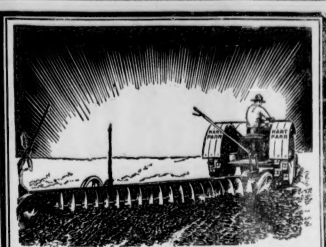

Cutting of the second crop of alfalfa has started in the south, and a somewhat lighter yield than usual is being put up. Sugar beets are being irrigated regularly and a good crop is promised.

"Dear Lord," prayed Pauline. "I don't ask anything for myself—but please give mother a son-in-law."

"Do you know Lord Heathmoor?" "I've often shot at his country seat."

"And did you ever hit it?"

According to a novelist, thirty is the proper age for a woman. If she isn't proper by that time, she never will be.

Pull Your Discs with Three-Fuel Power

Built for tractor power, the one-way-disc pulled by a three-fuel Hart-Parr cuts to full width at any depth. You need not just skim your land, for Hart-Parr power enables you to set the plow down where it belongs and keep it there. Two and even three one-way-disc plows are common behind the larger Hart-Parrs. They pay their way. Hart-Parr is the one tractor that develops tremendous power from gasoline, kerosene or distillate. We are now showing the improved 1929 line equipped with three forward speeds to speed up hauling and field work. Hart-Parrs are built for small, medium or large farms. Come in and see them.

Retailing Business Highly Competitive

The intensity of competition in retailing has led executives into intensive study of the details of the costs of business. Wholesale and retail grocers, wholesale and retail druggists, wholesale manufacturers and retail jewellers, shoe stores, department stores and automobile manufacturers in the United States have submitted the full details of their inventories and all items of the expense of doing business to such in-

sistencies as the Bureau of Business Research at Harvard University, or the Automobile Chamber of Commerce, so that comparative studies of cost might be available. In practically every line of merchandising there are cost studies available showing the average ratios of such items as total merchandise costs, salaries, rentals, insurance, taxes, depreciation, losses on bad debts, etc., to total sales. General rate of turnover, gross and net margins of profit, and in some cases rate of turnover on particular items are among the subjects concerning which a mass of data is being accumulated. Statistical studies of the comparative costs in large depart-

WORLD HAPPENINGS
BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Lucy, died at Brighton, England, yesterday at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Ducie, who died in March, 1927.

William Johnston, a powder monkey when the last shots were fired in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 88.

The British Admiralty has announced promotion of Admiral Sir Comdore Brock to be Admiral of the Fleet, to fill the vacancy caused by the transfer of Admiral Sir Charles Madden to the supplementary list.

Conceded among the ships' paint supplies, which are stored in the forepeak, 108 tons of opium valued at \$10,800 were seized by customs examiners on board the "Empress of Asia," of the Vancouver-Orient service. No arrests were made.

A sale of 62 imported cattle by H. Bull and Son, at their farm near Brampton, Ont., brought total receipts of \$80,224. It is said the sale was the largest of Jersey cattle ever held in Canada and the "Empress of Asia" has never been equalled on the continent since 1920.

Official circles have indicated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building activity in the north, as announced by Premier Ramsay MacDonald, of Great Britain, and President Hoover of the United States.

Self H. Nicholson, observer at the South Wilton observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eight times the magnetic intensity of ordinary sun spots. Dr. Nicholson said he was powerful enough to "blow" magnetic storms on the earth.

A Master Scientist

Dean Boyle, Of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. H. W. Boyle, M.A., Ph.D., dean of the faculties of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, and has not far behind Professor J. C. McLeannan, of the University of Toronto. During the war he showed that he was no more theoretician in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been responsible for devices for the detection of icebergs. He appears to be one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as well as for the University of Alberta has now given two of its staff to the National Research Council. Dr. H. W. Boyle, chairman of the council, is a former president of that institution.

Honey Extraction Plant

The latest machine is being installed in the new extension to the plant of the Hied Honey Company, at Tabor, Alberta, and prospects appear to be first class. The new addition will be for honey extraction and a daily output of about 8,000 pounds is expected during the active season.

Sheep Shearing in Alberta

Sheep shearing in the Picture House District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there are 23, most ranging in size from 35 to 150 ewes.

She: "I read those verses you sent me to day."

He: "What did he say?"

She: "That he was glad I was not going to marry a poet." — Ellen Munroe, Madrid.

W. N. L. 1927

Want Night Air Service

Demand From Hamburg, Germany, To Be Included in Post Office Plans. Hamburg, Germany, is demanding that it be included in the present plan for night flying services that are to cover all Europe. The promoters of the service say that the favorable position of the city with its first service does not necessitate its having a place in nocturnal flights. While Hamburg authorities admit this they contend that the great importance of their city as a commercial center demands that it should be included. They point out that Hamburg is the junction for air service from Scandinavian countries, and it should at least have night-service connection with Berlin and thence via Bremen to enable passengers arriving late in the day to continue their journey.

Church Collections Suffer

Using Big Nicks Instead Of Quarters in Offerings at Ottawa. Government men have been blamed for trouble in plenty, but Canada's law-makers are cited as the cause of a new ill. Decrease in church collections is the latest trouble laid at the door of the Dominion Government, and an Ottawa churchman has made the charge.

With the advent of the "big nickel," church collections have fallen off, a preacher stated today at a regular Sunday service. "The large denomination," he said, "are dropping into the collection plate with a flourish that belongs to nothing less than a quarter. I don't blame the smaller collections on the people, I blame the government."

Winnipeg Newspaper Union

For the past few days the Winnipeg Newspaper Union has been holding a strike. The union is demanding a 10 percent increase in wages and a 40-hour week.

HIGHLY PRIZED TROPHY

This is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regimental competition among pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from all over Canada to the north, from Nova Scotia to British Columbia, and is the great event of the year in Scottish-Canadian circles.

Riches Of Northland

Vast Treasure House of Precious Minerals in Northern Canada.

Last week Mr. W. C. Cline, Deputy Minister of Lands and Forests of Ontario, who has been studying northern Ontario all his life and is an enthusiast for that country, stated that in his recent trip to the far north he was given a picture of northern possibilities that was beyond his previous ideas on the subject. Some time ago "The Financial Post" told of the existence of a vast bed of amber underneath a lake in northern Manitoba. Already as a result of the publication of this article, which incidentally drew comments in British and American papers as well as Canadian papers—private parties have set on foot plans for the complete exploration of this deposit. Last week another article in this paper told of various indications of precious stones in the north and even suggested the possibility of diamonds being found.

Gold and silver are now common place in our northern picture and platinum is becoming almost famous in our mining lists. Iron ore in vast quantities exists in the north and on the islands of Hudson Bay and aluminum can be extracted from northern clays. Copper deposits are known to exist in Northern Saskatchewan and run into the Arctic Circle and air voyagers have skinned down upon the surface of lakes in the far north to find nickel and other base metals.

The north is an amazing country in future wealth. Canada no longer be regarded as a narrow belt 3,600 miles long. It is a vast country approximately 3,000 miles square with as much promise in the far north as in the east and the west. — Moore Jay Times.

A New Safety Device

Police Fliers Make Test Of Life-Saving Overalls.

"Life saving overalls," designed for trans-Atlantic flights, were given successful tests in Lake Maggiore, Italy, by two Polish fliers who were to fly from Milan to Chicago in mid-August.

The overalls are of an especially heavy rubberized fabric, equipped with valves by which they may be inflated. They will keep their wearers afloat for many days, their inventor asserts.

An added novel feature of the outfit is the equipment of electric batteries and light bulbs which will remain illuminated at least 60 hours. De Pavoni says.

Tinted Glass Aids Plants

Seeds grow better under greenish glass than when under plain glass. So declare workers in a greenhouse in Germany that have been experimenting with the tinted glass placed upon the glass-covered panes were five times as productive as those under the plain glass, and also remained green longer.

In Mammoth Cave, Kentucky, there are fish and crayfish that have no eyes.

The dog is worshipped as a sacred animal in India.

Ask Daylight Saving Act For Dominion

Move Being Made By City Council Of Stratford, Ontario.

In reply to a resolution from the city council of Stratford, Ont., in which the local council was requested to petition the Dominion Government to pass legislation by which summer time will be made effective throughout Canada, a special committee instructed the city clerk, George Beach, to obtain information as to whether Stratford council is asking for daylight saving time for the summer months only or all the year round.

In the communication received, it was pointed out by the Stratford council that the Dominion Government had already been approached and petitioned by the former body. The Regina aldermen are in favor of Dominion-wide daylight saving time being established for the summer months, but are opposed to it being effective all the year round.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water. When tender, remove the skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon butter and the parsnips, together with the yolks of two well-beaten eggs. Beat the mixture for five minutes. Add one cup of milk and mix thoroughly. Pour into a buttered baking dish and bake for 25 minutes in a moderate oven. Serve immediately, or the souffle will fall.

PINEAPPLE PUNCH

1 quart water.
2 cups sugar.
2 cups chopped pineapple.
1 cup orange juice.
1 cup lemon juice.
Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool if necessary. Either fresh or canned pineapple may be used.

Saskatchewan Farm Loans

Since the Farm Loans board was inaugurated in 1917, more than 4,500 farmers throughout the province of Saskatchewan have received assistance by way of loans from the board to December 31, 1928, according to the department of the treasury of Saskatchewan.

From the inception of the scheme to that date a total of \$13,000,000 had been loaned to farmers.

Since 1918 1,250,000 houses have been built in England, providing homes for five or six million people.

SUNDAY SCHOOL LESSON
AUGUST 11

DANIEL AMONG THE LIONS

Golden Text: "The angel of Jehovah encampeth round about them that fear him, and delivereth them."—Psalm 34:7.

Lesson: Daniel 6:1-28.

Devotional Reading: Psalm 91:9-16.

Explanations and Comments

Darius, Promoted, versus 1:1-7.—Pleased Darius to make Daniel one of the three presidents over his satraps, and because "an excellent spirit was in Daniel," the king thought so to him over all the rest of his realm.

The ingenious Plot Of Daniel's Enemies, verses 10-17.—The jealousy of the other two presidents and of all the satraps led them to try to compass Daniel's death. His record was unassailable; they saw that only on the ground of his religion could he be attacked. They then concocted a scheme so to play upon the king's mind as to petition any god or man save the king only—as though he were a god to whom the whole nation must pay divine honors. Whoever should violate this law would be cast to the lions. There was no doubt in Daniel's king's mind that he was immensely flattered and, all unprepared of the purpose behind the request, he granted it. Evidently he took no time for reflection, but he immediately referred to the law of the Medes and Persians, which he knew to be inviolable.

Darius illustrates the danger of a decision without the consideration of their consequences. The probable consequences of acts which we undertake should always be carefully considered, especially in their relation to others.—D. M. Falden.

Daniel continued his habit of prayer, as he did before the decree was issued; and not only did he but gave thanks in the midst of the fate he knew was approaching.

Early in the morning, before you come down into the streets of Babylon to hear his talk and breathe the impoverished atmosphere, open your windows and let out upon the world's strength. Wait until you feel your soul mounts up with wings like an eagle. Wait until you feel your feet can run upon errands of usefulness and not for show. Let your heart gain a fresh sense of the moral interest it cherishes toward you—and you will not be afraid of Babylon and all its lions.—Charles R. Brown.

As Daniel was consigned to the den of lions, he cried out in prayer, "Thy God whom thou servest, He deliver me."

After seeing the mouth of the den with his seal, the king passed the morning listening to the den. "Woe to the voice," he cried, "quivering with grief, he cried to the king, 'I have sent the lions and hath shut the lions' mouths,' answered Daniel, who was then unharmed."

Prince Is Expert Typist

The Prince of Wales has been revealed as an expert typist. On a recent trip to the north of England, he carried a typewriter with him, balancing it on his knees in the train and setting down his impressions of the journey.

Canada And The
British Market

Quality Shipments of Farm Products Just as Necessary as Quality Standard in Order to Hold Trade

In a very interesting article that has been written for the Country Guide of Winnipeg, W. A. Wilson, Canadian Agricultural Products representative on the Empire Marketing Board, brings out some of the reasons why Canada is not getting a larger share of the British foodstuffs market.

One point that he brings out is of very great interest; it is that quality itself is not sufficient to win the British market; there must be quantity as well.

What Mr. Wilson means is that sales contracts cannot be established and maintained in Great Britain unless there is assurance of an adequate and steady supply of the commodities. It is not only eggs, salmon, or other foods. This is the reason that Canada has not learned, he Wilson indicates. We have no steady supply of quality products that they are thoroughly satisfactory to the British consumer, but we have a steady supply for British buyers. The quality of our products is very much of shifting their sources of supply unless they are given every assurance that they can always get what they want when they want it.

Mr. Wilson believes that Canada is improving the quality of some food products, has shown ability in both leadership and workers. He is sure to be quite as successful in assuming that Canada can work out the problems of quantity production that is necessary to hold the British market.

To judge from the article one would assume that all that is necessary to overcome Canada's handicap is to lessen the inertia of the Canadian farmer and farm organizations. If the problem does not go deeper than that, it will not be difficult to solve. The Department of Agriculture at Ottawa and in each of the provinces and the various farm organizations have renewed opportunity to aid in expanding Canada's export trade.

Made-In-Canada Exhibition

Will Show Public Quality Of Goods Produced In Dominion

Co-operation of various bodies is to lessen the inertia of the Canadian Exhibition, which will be held in Montreal from November 4 to 9, already seems assured, according to reports received by the Canadian Manufacturers' Association, Quebec division, Montreal branch. "These reports," stated by the association, "concern the opinion strongly supporting the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers for Canadians."

WINDOLITE The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and ill-health.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays. That by using glass we are artificially excluding these vital life-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want of a transparent material which conclusively proved that it is a "most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and animals on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity of flocks of hens, and has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light of strong ordinary glass, double panes, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for nurseries, verandas, schools, factories, hospitals, sanitariums, hot houses and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls and lengths but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs. while a square yard of glass of ordinary thickness weighs about 125 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let

SUGGESTS THAT BRITAIN SINK PART OF FLEET

Washington.—Great Britain was called upon in a statement issued by the House of Commons, on the Foreign Relations Committee, to sink some of her ships as a means of reaching a parity with the United States.

Borah said England has 50 modern cruisers while the United States has eighteen built or building. If Great Britain will follow the example at the Washington conference, he said, "and sink some of her ships and thus come to parity, it will not only save the taxpayer but reduce the incentive to war—for huge armaments are always an incentive to war, parity or no parity."

"If we have to build up to parity, it is vastly increased expense of the taxpayer, and augments the incentive to war."

The Idaho senator was a trenchant critic of President Hoover, and it is presumed the impending naval limitations conference between Great Britain and the United States was discussed.

London.—The sacrifices entailed by the British Government's latest disarmament move are stressed by the Daily Telegraph, the newspaper pointing out the two cruisers, "Barrington" and "Northumberland," the submarine depot ship "Miles," and two submarines belong to the 1928 program and money had been voted many months ago.

Advices from Glasgow are that at least 700 men have been thrown out of employment by suspension of work on the submarine fleet there. The keel of the submarine had already been laid and the frame of the hull was being advanced.

Cotton Strike Still Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reduction

Manchester, Eng.—Lancashire's cotton mill stoppage continues with prospects dimmer than ever for an immediate settlement and return to work of its striking operatives.

The employers professed still to be ready to negotiate for a solution of the dispute and the card room workers and spinners seem prepared to negotiate with them, but the powerful weaving branch was determined to remain adamant in opposition to the proposed wage reductions.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave rivals to seize the national trade.

Germany, France and Japan were expected in these circumstances to profit over the opportunities presented.

The Mail declared northern France would reap a golden harvest, orders which ordinarily would go to Lancashire going to Lille, Roubaix and Tourcoing. The paper said the cotton textile mills were working at top speed.

The Express printed an article by an unnamed authority, attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

Predicts 300,000,000 Bushel Crop
Toronto.—Col. Ralph H. Webb, former mayor of Winnipeg, said here that in his estimation the total Western Canadian wheat crop would amount to about 300,000,000 bushels. From his sources of information he believed Manitoba would have the best crop for some years and while there will be many lean spots in Alberta and Saskatchewan, other portions of these provinces would show good yields.

Sentenced For Manslaughter
London, England.—Richard Joshua Reynolds, 22-year-old American, of the wealthy Reynolds tobacco manufacturing family, was sentenced in Old Bailey Court to five years in prison without hard labor on a manslaughter charge growing out of an accident last May in which a motor cyclist was killed.

Progress Is Satisfactory
London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation has raised the belief in well-informed circles here that participation of other naval powers in the conversations may not be delayed as long as previously was anticipated.

Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax by 1931, was heralded here by Mr. J. H. MacGillivray, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Gypsy Moth to a perfect landing at St. John's, Newfoundland.

"Progress in Canadian aviation has been satisfactory," said Gen. MacGillivray, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed, and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacGillivray stressed the importance of perfect organization and pointed out that links were already started in both east and west.

Completion of the service will witness feeders being supplied from northern provincial districts such as Hudson Bay, the Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast one of the most extensive and enterprising services in the world."

Increase Shown In Infantile Paralysis

Warning Sent From Ottawa To Guard Against Outbreak

Ottawa.—Telegrams went forward from Dr. J. A. Anstey, deputy minister of health in the Dominion Government, to all the deputy ministers of health in the provinces advising them that returns showed an increase in infantile paralysis, warning them as to the best methods to be adopted should the situation become acute.

A "flu bug" is also being rushed through the Government printing bureau and will be widely distributed throughout the Dominion to combat it in the light of recent developments. The book has been written by Dr. Helen MacMurchy, chief of the division of child welfare. It will be issued under instructions of Hon. Dr. King, Minister of Pensions.

Some three years ago infantile paralysis was prevalent in California and other Pacific Coast states. British Columbia was not seriously affected. In 1927 it spread to Alberta where there were 354 cases. Last year it reached Manitoba where there were at least 425 cases. The increase noted in Ontario. The department does not wish to frighten the public, but it is anxious to guard against a danger which may develop quickly because of the contagious nature of the disease.

To Form Canadian Geographical Society

Will Also To Make This Country Better Known To Canadians

Ottawa.—A national board of directors has been elected as a first step in establishing the Canadian Geographical Society aimed at making its country better known to Canadians and to those outside the Dominion. The society intends to issue a magazine.

The directors are: Dr. W. B. Brock, University of British Columbia; Dr. E. C. Stenson, president of the University of Alberta; Dr. W. C. Murray, president University of Saskatchewan; J. W. Dufour, managing editor Manitoba Free Press; and Dr. Charles Cammell, Deputy Minister of Mines.

Admits Bank Robbery
Smithers, B.C.—James Wesley Burke, captured recently after a two weeks' man hunt, has admitted robbing the Royal Bank here of more than two thousand dollars on July 17. He was committed for trial on a charge of robbery with violence. Practically all the money taken has been recovered.

To Attend Labor Session
Ottawa.—Right Hon. J. H. Thomas, Lord Privy Seal in charge of the unemployment situation under the Labor Government in Great Britain, has accepted the official invitation of the executive of the Trades and Labor Congress of Canada to be present at its convention which will be held at Saint John, N.B., during the week of August 26.

Replies To Critics

President Hoover Feels Justified In Postponing Work On Cruisers

Washington.—The agreement between the United States and Great Britain looking to complete equality in the strength of their navies is held out by President Hoover as evidence to critics of his decision to postpone work on the three cruisers laid down in navy yards east of fall.

Quoting our naval authorities as regarding parity with Great Britain as "a complete defence of the United States," the president said that the importance he attaches to the London agreement in a letter replying to critics of cruiser postponement action, by Paul V. McNutt, national commander of the American Legion.

WESTERN PORT IS LEADING IN GRAIN SHIPMENTS

Ottawa.—Vancouver leads the country in grain export with a volume of 51,232,000 bushels shipped through the port up to the end of the first six months of the calendar year, commencing June 1, Montreal exported 43,549,140; Saint John, 22,622,810, and Quebec, 5,557,573 bushels. No exports of this commodity passed through St. John in May or June, the opening of navigation resulting in a transference of this business to Montreal, whose figures for the year begin with the month of May.

The volume for Halifax is not available, but is known to be considerably greater than last year. Grain from the United States furnished more than fifty per cent. of St. John's exports. American exporters shipped 1,238,569 bushels against 1,624,116 bushels Canadian grain. This quantity of the American commodity was greater in the first four months of the current year than in the whole of 1928.

Last calendar year Montreal shipped 21,295,379 bushels, of which 145,599,958 was Canadian grain and 62,695,421 American. Vancouver shipped 97,250,438 bushels, all Canadian grain. Vancouver's exports increased by 52,232,921 bushels over 1927 and Montreal's by 16,047,463 bushels.

To Locate Beacon Station

Depot To Be Established For Airplane Pilots Near Brandon

Brandon.—Federal authorities have decided to locate a beacon station for the guidance of airplane pilots one and one-half miles east of Brandon, Manitoba. The station will be a light house. Two men are stationed at the depot, one for day and the other for night duty. It is understood that the beacon station to the west will be Brandon view.

HEADS ONTARIO MASONS

C. R. McKewen, of Toronto, chairman of the Ontario Railway Board, who has been elected grand master of the Masonic Grand Lodge of Canada in the province of Ontario.

Edmonton Judge Holds Court At Alkavik

Travels 2,000 Miles To Teach Eskimo He Breaks The Law

Alkavik, N.W.T., a verdict of guilty of manslaughter was returned in the case of Okchika, Eskimo, by a jury at Alkavik, recently before His Honor Judge Dudgeon, of Edmonton. The trial was held at Alkavik, in the Northwest Territories, with Judge and jury.

Okchika, the Bathurst Inlet Eskimo, was found guilty of murdering Okook, another Eskimo, in the fall of 1927. The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Truesdell. Okchika was sentenced to one year's imprisonment at Herchel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles of law and justice for which the British empire has fought through centuries.

Making Secret Trip In Moth Airplane

Believe Machine Going North For Mineral Exploration Purposes

The Pas, Man.—A secret trip into the Northwest in a moth plane is underway with Capt. W. N. Sheppard, of Dominion Explorers' aerial staff, at the controls. The flyer hopped off from here for Lac La Ronge, in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the North for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth biplane type. Most of the country over which the machine is flying is remote from habitation and a forced landing en route would place the pilot in grave danger.

CELEBRATE DOMINION DAY IN JAPAN

The photograph here shows a scene at the new Canadian Legation in Tokyo, Japan, on last Dominion Day, when celebrations, its first public function, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

Canada's Consumption Of Gasoline Mounting

New Record Made Last Year With 47,000,000 Gallons

Montreal.—Canada consumed about 47,000,000 gallons of gasoline last year, according to an estimate made by The Financial Post. This is a record figure, and exceeds any previous year's consumption by from 20 to 25 per cent.

Five years from now Canadian consumption of gas will probably top the billion gallon mark, so rapidly is the consumption of this all-important product increasing. This year's consumption will probably be in the neighborhood of 57,000,000 gallons, for not only are automobile registrations increasing currently at 14 to 15 per cent. per year, but the use of tractors and gas-burning machinery on the farms; the increasing tourist traffic; a higher mileage per car and the introduction of aeroplanes, all have their part in swelling our annual gas bill. The increase is significant in view of the tremendous investment interest in the gasoline business.

POOL PAYMENT OF FORTY MILLION ON 1928 CROP

Winnipeg.—Nearly \$40,000,000 in being distributed as a second interim payment to wheat growers by the Canadian Wheat Pools. The basis of the wheat payment is 2 1/2 cents per bushel No. 1 Northern, 2 1/4 cents per bushel No. 2, 2 1/4 cents per bushel No. 3, 2 1/4 cents per bushel No. 4, 16 cents per bushel No. 5, 8 cents per bushel No. 6, 4 cents per bushel No. 7, 4 cents per bushel No. 8, and 4 cents per bushel No. 9. There is a wide range in the payments on other grades, varying from as high as 34 cents and 36 cents per bushel on two or three grades down to 2 cents per bushel on the smallest parcels.

Interim payments on Durham wheat are: No. 1 Amber, 22 cents; 15 1/2 cents; 16 cents on No. 2; 12 cents on No. 3; 13 1/2 cents on No. 4; 14 cents on No. 5; 8 cents on No. 6; 8 cents on No. 7; 8 cents on No. 8; and 4 cents on No. 9. Last year the Pools advanced a new policy of adjusting all claims and making deductions for elevator and commercial reserves, carrying charges, etc., in the second interim payment, and this has been followed this year. As a result, the final payment, which will be made at the end of the crop year, will be a full payment on all grades.

In making the above announcement, E. B. Ramsay, general manager of the Canadian Wheat Pools, made the following statement regarding the interim payment on grade six and feed wheat.

"The members who delivered wheat of these grades will remember that when the reduction was made in the initial payment last fall, from 85 cents to 80 cents per bushel, concession was made to members, the lower grades to meet a very difficult situation. A large proportion of the price of their grain was paid than in former years; for while the drop in the initial payment on the top grades was 15 cents below the previous year's basis the drop on No. 6 and feed wheat was only five cents per bushel. Prices of the lower grades, therefore, did not depreciate from the previous year's prices in the initial payments. In the same proportion as did the higher grades, even in the face of the very heavy deliveries of these lower grades which the Pools received."

The first interim payment on the 1928 crop was made by the Wheat Pool on March 1, last, when a full payment of 12 cents per bushel was made on grades one to five, with the exception of grade No. 6, on which the payment was 10 cents per bushel.

An interim payment amounting to over two and a half million dollars is also being distributed by the Co-operative Grain Pools of Manitoba and Saskatchewan. An interim payment of 15 cents per bushel on 2 C.W. oats brings the Pool payment to the present to 55 cents per bushel, and 11 1/2 cents per bushel on 3 C.W. oats brings the payment on that grade to 48 1/2 cents per bushel. The interim payment on barley is 7 1/2 cents per bushel, bringing the total to date on 8 C.W. barley up to 67 1/2 cents. The interim payment on this is 34 cents per bushel, No. 1 N.W. bringing the total to date up to \$1.90 per bushel. Interim payments on rye are 9 cents per bushel for No. 1 and 2 C.W. and 7 1/2 cents for No. 3 C.W., and 10 cents for rejected. Earlier payments amounted to 82 cents per bushel for No. 1 and 3 C.W.

LITTLE TROUBLE FROM ANTI-WAR DEMONSTRATIONS

London, England.—The anti-war demonstration sponsored by Communist organs in London, the world, passed off peacefully and left large and apprehensive forces of troops police in the capitals of Europe with little work on their hands.

The most serious disturbance reported was in Canton, China, where Russian law was declared for the day after grenades had been thrown in a government factory.

Although such meetings as were held in European cities passed off quietly, for the most part under close police observation, there were scattered clashes with the authorities and several scores of persons were added to those already in jail.

Gathering under the slogan of "War Against War," Communists over the entire Soviet Union took part in the demonstrations, which also marked the 15th anniversary of Russia's entry into the world war. Hundreds of thousands of persons filled the streets of Moscow in long files in the 20,000,000 people, many banners and flags.

Demonstrations on a large scale were held in Moscow, Leningrad, Kharkov and other cities at which resolutions were passed declaring the danger of a new war and pledging support to the government. The Soviet Government in the meantime has passed a resolution passed at the Moscow gathering protesting against the attitude of the British Government in the Anglo-Soviet negotiations.

France, whose Communists had made the most extensive preparations for the demonstrations, was not disturbed day. About 900 Communists were arrested in the Paris area where they had gathered in a guard at all public buildings and in the factory suburbs. Police raids continued late into the night.

Aeroplanes flew over the city watching for demonstrations but only in the suburbs, where 100 workers at the Citroen plant rioted and fired on a train car, was there trouble. The riot was quickly halted. Andre Tardieu, minister of the interior, and Jean Chiappe, prefect of police, stated that the day was calm with only minor and isolated disturbances. The Communist trains in the provinces were halted by French guards, and Paris police seized tracts from the Communists to stage a great parade on the boulevards.

Clashes occurred in a number of German cities and in Copenhagen, where several Berlin where two members of the police guard were slashed with knives.

Will Check Liquor Runners

Ottawa To Ascertain Whether Canadian Engage In Traffic

Ottawa.—A check-up is to be made of the liquor running activities along the Canadian coast. The government is now making a survey of the most of national revenue to ascertain just what number, if any, engaged in the traffic are Canadians. This will be done to enable the government to reach a conclusion whether there is a sufficient number to make it worth while introducing legislation in the next session of parliament to prevent citizens of this country from obtaining clearances for liquor going to the United States.

The recent statement of Hon. W. D. Fisher, minister of national revenue, announced that 40 Canadian men were put them out of the business would be introduced.

Two Killed By Explosion

Metal and Tank Blown 300 Feet Into Air

Trail, B.C.—Two men were killed almost instantly and a third injured when an acetone gas tank exploded in the acetone burner shop of the Consolidated Reduction plant here.

The explosion threw metal 200 feet into the air. The tank itself rose to that height and came crashing back through the roof of the gas house, doing damage there.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$36,053,317 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

Mr. and Mrs. Manhard returned from Blackfalds recently and as usual it rained.

The Home Grain Co. has merged with the Searle interests and will in future be known by the latter name. Four hundred elevators are included in the amalgamation.

A McLeod of Calgary has taken over the Savoy Cafe and intends putting on a first class restaurant service. Mr. McLeod is thoroughly experienced in the restaurant business and in his hands the Savoy should take its place as one of the best eating places on the line.

Mr. and Mrs. J. Fields and family motored to Champion from Calgary on Monday, July 29th, leaving the four children at F. J. Clapp's, where they were visiting. Mr. Clapp drove the children to High River on Sunday, where they were met by the parents.

The members of the Champion council attended the Sunshine trail convention in Lethbridge this week in a body. Mayor Tyler addressed the meeting, which endorsed the principle of the new gravel road passing through all the towns en route. The Alberta road commissioner was present at the meeting, which included delegates from all over the province and the state of Montana.

Jay Little wishes to thank all those who sent flowers during his stay in the hospital.

Mrs. W. E. Watkins is visiting her daughter at Carbon.

The next meeting of the W. I. will be held at the home of Mrs. J. D. McDougall next Tuesday, August 13th.

It did considerable damage in a small strip west of town on Saturday night, some losses being estimated as high as fifty per cent. The area damaged was not large and in most instances the damage was light.

F. C. Alecock discovered a new potato in which a stem of grass was rooted, the root going clear through the spud. It was quite a novelty.

The Church has completed his contract on the Tutu Valley road and is now looking for more roadwork.

Jos. Hicks, barrister, of Barons, will be at L. J. Adams' office every Tuesday and Friday where he may be consulted.

W. F. Bozarth, who returned recently from a tour of the central States accompanied by his family, states that the conditions prevailing on the farms in Illinois, Iowa and part of Kansas is very far from satisfactory and the majority of the farmers are financially embarrassed as the result of continued light crops. In all the territory covered it is Mr. Bozarth's opinion there is no place like home for satisfactory agricultural achievement.
